PORTABLE VIBRATORY
FINISHING MACHINE**

LESTHER 2016 PORTABLE VIBRATORY FINISHING MACHINE

The Lesther Metal Finisher 2016 is a compact vibratory finishing machine. This heavy-duty deburring and finishing machine will work on a wide variety of parts. This quiet machine is portable, easy to use, economical and has a noise damping cover.

Available in 2 1/2 cu. Ft, the Lesther Metal Finisher 2016 is on casters for portability and plug into any 120-volt, 20 amp, electrical outlet. This unit has a standard sound cover. Easy to use, this noise lid will help protect your workers and reduce noise in the workshop. An internally stored compound re-circulation system is also standard on all units.
